I'm running a Linux server on Amazon AWS with VPS (CentOS 7.2). In the admin panel, I'm trying to use the ODBC connection to access the db2 database, but it's not working. The connection is specified as follows: Connection type: ODBC Name: AMAZON_DATABASE Driver: DB2 ODBC In order to use it, I have the packages: sudo yum install ibm-db2-odbc sudo yum install db2-odbc-11.1.0-1.0.0.amzn1.x86_64 sudo yum install sqlliteman ibm-db2-sqlliteman-devel However, the connection just doesn't work: Is there anything else I'm missing? A: The following is working fine for me 2d92ce491b
