Tansee All In One Box is a useful software which is specialized on content transfer from iPhone, iPad and iPod devices. Users can backup data and manage it with just a few clicks. 10/5/2010 10:13:43 PM Greg Haworth Tansee All In One Box is one of the best of its kind and it helps you save time and money. Most people go to websites to find instructions on how to download the application. This can lead them to spend some time and money and let's face it, not everyone is willing to do

this. If you are looking for an easy way to backup your phone, try Tansee All In One Box. It does all the work for you so you don't have to do a thing. 10/5/2010 10:04:15 PM jeff

Tansee All In One Box is a very simple application which does not have much features, but it does do what it is meant to do. It is a straightforward and handy application which does not require any technical skills on the part of the user. It is a great application which does everything an iPhone, iPod and iPad owner could need to get the content onto any kind of computer or server.

10/5/2010 4:09:37 PM jeff It is an application which is not easy to use, but it does what it is supposed to do. It is a simple application which does not have a lot of options, but it does the job. It is a great application which can help people with all the important stuff they need on their iPhone and iPod. 9/24/2010 3:06:47 AM jeff

What this application provides is fantastic. It does everything it is meant to do. It can take care of all the important stuff a person would want to do on an iPhone or iPod.

9/24/2010 1:33:38 AM jeff This is a great application that can save a lot of

money for those who need to do data recovery. It has the ability to identify as many different kinds of phones as there are in the world and it can recognize the phone and screen size. 9/11/2010 10:41:24 PM jeff If you do not want to be a victim of identity theft, it would be a good idea to use an application called Tansee All In One Box. This

What's New in the?

Uncomplicated GUI for ease of use the main window of this program is quite simple and it allows users to

access any of the modules without any effort. The looks may be less polished, but functionality prevails and Tansee All In One Box is certainly more practical than visually appealing. For each of the built-in modules most of the space is reserved to the files contained on the connected device, so the user can select the desired files and transfer them. Backup data with just a few clicks Tansee All In One Box is equipped for several file transfer operations, so, depending on the type of content that has to be copied from the iPhone, iPod or iPad, there are

some specialized apps one can use. Thus, users have the possibility to view and save SMS and MMS messages from the connected gadget as ANTS databases or TXT text files and even add a password to make sure no one can access the information without providing the passkey. Other operations that can be easily carried out with the tools included in Tansee All In One Box are the transfer of all contacts, multimedia files, including photos stored onto the target device

Key Features: - It can transfer data from iOS powered devices; - Backup and restore data from iOS powered

devices; - Transfer contacts from iPhone to computer; - Transfer multimedia files from iOS to computer; - Backup and restore SMS and MMS messages from iPhone; - Transfer photos from iPhone to computer; - View and save SMS and MMS messages from iPhone as ANTS databases or TXT text files; - Add password to make sure no one can access the information without providing the passkey; - Transfer contacts from iPhone to computer. Monitor and manage USB storage devices on the local network and sync content between them. Any file,

folder or volume can be shared between 2 or more USB storage devices. A multi-tasking device, easily synchronized with any other multi-tasking device. If you already use this software on your iDevice you can use the new KeyFeatures mentioned below or with the free edition of iExplorer. Also, the same files and folders are shared between devices via WLAN and both devices can be managed on the same app. This means when you remove the USB storage device from one device and add it to the other device the files are synchronized. Devices can have

all the available USB storage devices mounted at once. You can now check if the device is mounted on your system or view the
