In December 2013, Autodesk introduced Revit, an entry-level 3D CAD software application for building information modeling (BIM), for Windows and Mac OS, with Linux, Windows, and OS X versions under development. Unlike AutoCAD, Revit is not sold as a complete package and it is intended for non-professional or hobbyist use. The Revit app allows users to create floor plans, architectural designs, and architectural models that are more visually appealing than those created with AutoCAD. In August 2014, Autodesk acquired the closed source Linux-based AutoCAD LT (basic/lightweight CAD) application. With the acquisition, Autodesk acquired Autodesk 360, a commercial cloud-based service for cloud-based drawings created with AutoCAD LT. In October 2017, Autodesk introduced AutoCAD LT 2016, the first major revision to AutoCAD LT since 2012. AutoCAD LT 2016 features a new shell, improved functionality, better error messages, and new tools, among other things. Revit Architecture is a commercial product for architectural design and documentation. It features 3D modeling, 2D drafting, rendering, and presentation. AutoCAD LT features a simplistic but usable 2D drafting interface. It is intended to make CAD more accessible to non-professional users, such as architects, engineers, contractors, designers, contractors, and hobbyists. It provides various tools for drafting a wide range of 2D objects, including rectangles, circles, polylines, and arcs. These are the 30 most used feature of AutoCAD software: 1. "I was born and raised in this house and am 74," she said. "We've seen some big improvements, but to have a group come in and help us get the house looking nice, it is a good feeling." Over the last year, the neighborhood has been in discussion on how to keep the house up to date. In October, the group started digging up the front yard and in November, went to clean out the house. "Over the past year, we have gone through what the house has seen from housing in Maryland over the years," said Catherine Daines, who has lived in the neighborhood for 36 years. "There have been several owners who have bought and sold and there has been a lot of neglect." In the past, the neighborhood has hired private contractors to come in and get the house up to date, but with the neighborhood now accepting donations, the cost will be much lower for the community, Daines said. "It is more cost effective for the community," she said. The group started in November cleaning the house, but plans to continue through March. "We have donated time and resources for the community and wanted to show what can be done," said Annezia Stiles, who has lived in the neighborhood for five years. "It really makes you happy to see someone look at your house and say 'I'm going to come help you
