Oracle Business Intelligence Crack + X64

1. Oracle Business Intelligence Server (OBI Server): It is the engine that drives Oracle Business Intelligence and sits in the middle of Oracle BI and your business intelligence applications, data sources, and reporting. OBI Server collects business metadata to enable it to understand your business. 2. Oracle Business Answers (OBA): OBA is an ad-hoc query and reporting tool. It enables users to query and retrieve any report, views, or Web Application that exists within OBI Server, and run reports, views, queries, data queries, and drill-downs using a Web browser. 3. Oracle Business Intelligence Interactive Dashboard (OBID): OBID is a graphical user interface (GUI) tool that enables users to quickly and easily create and run interactive reports and dashboards. OBID provides a rich set of features that allows you to visualize and analyze data and deliver high-impact information in the context of your business. OBID enables users to leverage the OBA functionality within OBI Server to generate reports for presentations or web services. 4. Oracle Business Intelligence Enterprise Edition Plus Disconnected Analytics (OBIEE_DA): OBIEE_DA is a full-featured OLAP package that extracts, transforms, and loads data from your databases and provides fast and easy analysis of your data. It combines the speed of an interactive OLAP tool with the functionality of a traditional, stand-alone OLAP tool. 5. Hyperion Enterprise Reporting (Hyperion ER): Hyperion Enterprise Reporting is a powerful, easy-to-use tool that enables you to create and publish different types of book-quality reports, presentations, and e-mails, or to make them interactive for access online. 6. Hyperion Financial Reporting (Hyperion FR): Hyperion FR is a powerful, easy-to-use tool that enables you to create and publish different types of book-quality reports, presentations, and e-mails, or to make them interactive for access online. It includes detailed journal entries, transaction listings, balance sheets, cash flow statements, visual charts, and a variety of other reports. 7. Hyperion Web Analysis: Hyperion Web Analysis is an easy-to-use tool that enables you to preview and analyze any format spreadsheet including normal spreadsheet, HTML, XML, and XML extract files from the Hyperion Content Server. Users can easily and quickly put together and publish reports in any format. IBM Cognos Business Intelligence 3.0 IBM Cognos Business

What's New in the?

Oracle Business Intelligence (BI) Server is an application server that provides a powerful, proven, and scalable set of BI capabilities through a Web Services-Oriented Architecture.
