Face-OP is a photo distortion application with support for BMP, DIB, GIF, IFF, JIF, JPG, LBM, PCX, RLE, TGA, TIF and PNG file types. It has a built-in file explorer and several types of face operations, such as growing, shrinking, smear, and lugging. Simple setup and UI The installation procedure is fast and shouldn't give you any trouble. As far as the interface is concerned, the software tool adopts a standard window split into three panes, where you can open pictures, perform the photo distortion, as well as save and print the image. Find and preview images The built-in file navigator lists all pictures from any selected drive or directory, and you can filter them by format. After picking a photo, you can preview it and find out its width and height, along with the number of colors. Apply effects to distort the photo The image is loaded with its actual size. You can select an instrument from the menu when it comes to growing, shrinking, smear and lugging, as well as use the mouse to click and draw on the photo sections you want to distort. It's possible to adjust the strength and radius of the brush, zoom in and out of the full image, restrict the effect to the horizontal or vertical axis, and use a rubber to fix mistakes. There are no options implemented for undoing and redoing actions. If you're pleased with your work, you can save the picture to file or print it.

Evaluation and conclusion It didn't put a strain on the overall performance of the computer in our tests, running on low CPU and RAM. No error messages were shown and the program didn't hang or crash. On the other hand, the effects of Face-OP are outdated. Unfortunately, the tool hasn't received updated for a long time. KEYMACRO is a software utility designed to take snapshots of keystrokes and save them as macros, for use in the most popular editor products. KEYMACRO is also useful as a bit of a diary, enabling you to record all the events in your life, from the birth of your first child to the last move of your last lover. KEYMACRO is easy to use: there's no need to know programming or editing, just press the print button, type in the text, and click the button again to save the macro. Each macro can be assigned a function: the first one will be a keyboard shortcut, the second a text box into which you type, the third will be a bit of text, the fourth a word, the fifth a phrase, the sixth an image, the seventh a bitmap, the eighth a shape, the ninth a link and the tenth a toolbox. You can add as many macros as you like. KEYMACRO is perfect for any computer. You can save and upload the macros to the website that supports it. Editing Tools: IntelliKeyM (Quick-n-Copy, Quick-n-Paste, Mouse-Copy, Auto-Clipboard) Arrow-Keys, Alt-Tabs, Alt-Paste, Alt-Tab, Double Click, F1, F2, F3, F4, F5, F6, F7, F8, F9, F10, F11, F12, F13, F14, F15, F16, F17, F18, F19, F20, F21, F22, F23, F24, F25, F26, F27, F28, F29, F30, F31, F32, F33, F34, F35, F36, F37, F38, F39, F40, F41, F42, F43, F44, F45, F46, F47, F48, F49, F50, F51, F52, F53, F54, F55, F56, F57, F58, F59, F60, F61, F62, F63, F64, F65, F66, F67, F68, F69, F70, F71, F72, F73, F74, F75, F76, F77, F78, F79, F80, 1d6a3396d6
