Overview In the first part of this guide, I will introduce you to the AutoCAD program itself and how it works. In part 2, we will discuss creating a design project in AutoCAD, creating and editing drawing elements (lines, arcs, polygons, text, and dimensions), and drawing multiple views. In part 3, we will learn how to customize the look and feel of a new drawing. When AutoCAD first debuted in 1982, it was one of the first programs that allowed designers to draw directly on the computer. Today, CAD programs are more like word processing programs than drawing tools because they use desktop publishing and graphics technology to edit text, create paths and lines, and to animate and present designs. The first CAD programs were designed on small computers, such as the Apple II. These early programs required a skilled, experienced user. Although these early CAD programs did not allow the creation of complex models and calculations, they did allow the creation of electronic catalogs and a limited assortment of manufacturing templates. Today, CAD programs are used by every type of designer from architects and engineers to graphic designers, sculptors, and cartoonists. The Basics of AutoCAD AutoCAD is an incredibly powerful drawing program for creating architectural and engineering models. To get you started, it is easiest to learn AutoCAD by drawing a simple model that contains only one or two buildings. You should be able to complete this task on your first try. To quickly access basic drafting commands, click on the Home tab on the Ribbon. Select the window style of your choice and click the AutoCAD area (see Figure 1-1). The AutoCAD area appears with all of the drawing tools on the ribbon at the top of your drawing area (see Figure 1-2). Figure 1-1 Select the AutoCAD area. Figure 1-2 The AutoCAD area is on the Ribbon. Once you have the window style selected, click on the drawing area to place it on the screen (see Figure 1-3). If you are unsure of where to click, click the bottom-right corner of your drawing area. The AutoCAD area opens at the top of your screen and shows all the tools on the ribbon at the top of the drawing area (see Figure 1-4). Figure 1-3 Place the AutoCAD area to the top of your screen. We are in the last 2-3 weeks before school started for some of our children and I needed some way to keep myself and my family busy. This month's Go Beyond the Box was the perfect activity for my family and me. I am so glad I tried this month's challenge!

**Box Basics:** The first step is to choose a box and theme to fit your interests. The second step is to decorate the box with items you already have.

124 U.S. 437 (1888) BASIN PUDDING COMPANY v. HOLMES. Supreme Court of United States. Argued November 6, 7, 1888. Decided November 21, 1888. ERROR TO THE CIRCUIT COURT OF THE UNITED STATES FOR THE EASTERN DISTRICT OF ARKANSAS. Mr. Thomas J. Semmes and Mr. A.H. Garland for plaintiff in error. Mr. John H. Rice for defendant in error. MR. CHIEF JUSTICE WAITE delivered the opinion of the court. It is contended that the assignments upon which this action is brought are void as against the claims of the estate of Melinda H. Holmes, to whom, it is claimed, they are made subject, in that the act of Congress under which they were made makes no provision for the enforcement of such claims. The act of 1868, § 3, c. 152, 17 Stat. 455, 456, provides as follows: "That the estates of all persons, who, at the time of the passage of this act, or at the time of their decease, have any claim or demand on the Government of the United States or any of its officers, for or in respect to any sum of money or property, either real or personal, be held and considered as belonging to the United States, and that it is thereby given to the claimant or to his or her legal representatives, without delay or suit, the value of such sum or property, with interest thereon, from the date of the demand, as shall be fixed by the Secretary of the Treasury, being first ascertained in the manner therein provided. Provided, That nothing in this section shall affect suits and proceedings pending at the passage of this act, nor the right of parties to the same to have their claims and demands therein adjudicated, in the mode in which the same are usually determined in the courts of the United States." The claim involved in this suit was for money received by the government for cotton that was delivered to an agent of the plaintiff. A claim like this is one in respect to money or property within the meaning of this act. It is an asset of the United States, and the right of the assignee is to have its value fixed as required by the act, and then to receive it in the \*438 same manner as the government would in a court of law. It is also within
